RE: 2008 Merit Construction Awards of Excellence

Dear Sir or Madam,

The North Penn and North Wales Water Authorities submit this letter of recommendation in recognition of the exemplary performance by Allan A. Myers (AAM) in constructing the expansion of the Forest Park Water WTP.

AAM successfully completed the complex project on schedule while meeting the high standards of workmanship required by the water authorities. Particularly challenging was the unique conversion from conventional media filtration to advanced membrane filtration. The conversion of existing filter boxes to membrane cells required AAM to perform heavy demolition and concrete construction in the confined area of the filter room while the plant staff simultaneously operated the filtration system to maintain the flow of water to the customers of NPWA/NWWA.

The project included several other substantial components, including, a new chemical building, 5 new granular carbon contactors, a sodium hypochlorite generation system, and wastewater basin improvements.

In our view, the professionalism and workmanship demonstrated by AAM is worthy of special recognition from their peers.

Sincerely,

Jeff S. Pifer
Manager
